

Activating your MongoDB for FireWorks

- Log into Perlmutter using your training account password
`ssh user@saul-pl.nersc.gov`
- Retrieve the MongoDB credentials shared with your account
`take -u usinha -a`
- This will transfer the MongoDB credentials to a folder in your \$HOME directory
`user@login01:~> ls credentials-for-db-fwt_*`
- Use your favorite editor to open
`credentials-for-db-fwt_user-on-mongodb05.nersc.gov`
- Test your credentials by logging into MongoDB:
`user@login01:~> module load mongodb`
`user@login01:~> mongosh -u fwt_trainXYZ_admin mongodb05.nersc.gov/fwt_trainXYZ`
`<<Provide your mongo admin pwd>>`
- Keep your credentials file - you will need it to initialize FireWorks
- Your training databases will be removed in May. NERSC Users may request a permanent database using the form provided at <https://docs.nersc.gov/services/databases/>
